

# Genuine Neapco and OE Series Heavy Duty Universal Joints

Manufacturing Driveline Solutions®  
in the USA Since 1921.

# Genuine Neapco and OE Series Heavy Duty Universal Joints

## Enhanced Features and Benefits:

- 1610 - 1810 Universal Joint Series
- Advanced features that optimize performance and product life for universal joint series: 1610, 1710, and 1810
- 100,000 mile lube interval
- Covered by Neapco's "Extended Warranty"
- Tested, Trusted, Proven designs
- Supported by Neapco's outstanding technical and Customer Service teams
- Special nylon thrust washers eliminate metal-to-metal contact:
  - Eliminates friction which generates unwanted heat
  - Reduces wear and extends life
- Retained-needle bearing design keeps bearings in place for easier installation
- Bearing package ensures long, trouble-free life
- Nitrite, triple-lip sealing package keeps lubrication in and contaminants out, for extended life
- Bearing design permits smaller clearances in the kit resulting in easier initial driveshaft balance and a maintained driveshaft balance in the vehicle
- Large diameter trunions provide optimal strength
- Corrosion-resistant seal guard protects and secures advanced slip seal
- Designed for higher angle applications such as inter-axle driveshafts

Genuine Neapco and Neapco OE Series Heavy Duty Universal Joints include the following series: 1610, 1710, and 1810.
