Ford Bronco Front Propshaft

Enhanced Features and Benefits:

Neapco is pleased to announce our new welded Front Propshaft Assembly for Ford Bronco. This product offers a quality solution when looking to convert the factory-installed propshaft that utilizes high-speed constant velocity joints to a traditional universal joint configuration for Bronco applications from 2021 to the current model year (Not compatible with Bronco Sport models).

- Direct bolt-in replacement
- Compatible with all OE Engine/Transmission offerings
- Properly phased to reduce/eliminate driveline NVH
- Robust steel construction
- Performance 1310 series U-joints
- Assembled, painted and balanced
- Manufactured in Beatrice Nebraska U.S.A.

Part Number: N131-27-FBPA
